

IWB Biomass Power Plant Basel (Switzerland 2006 - 2008)

Project Description:

- ✓ Fluidised bed incinerator for biomass
- ✓ Production of electrical energy and steam for district heating

Capacity:

- ✓ 30 MW fuel heat capacity
- ✓ Emissions according to Swiss law

Plant Concept:

- ✓ Storage of biomass
- ✓ Boiler with integrated fluidised bed incineration
- ✓ Dry flue gas cleaning plant
- ✓ Existing water steam cycle with turbine

TBU: basic engineering, detail engineering, supervision of production and assembly of combustion as well as start-up of the whole plant
